

Hammers and DARTEL standard space in CAT12 seem almost identical, the difference in world coordinates being 1.5×10^{-13} mm with the ExploreASL TestDataSet. Hammers & the CAT12 GM template overlaid in red:

If you add the option `x.bHammersCAT12`, the Hammers atlas ROIs will be created by CAT12 and by ExploreASL added to `analysis/Population/TissueVolume/catROI_T1_<SUBJECTS>.tsv`
